DESIGNED TO LAST

Sturdy and solid, **CWT** urban fountains have been designed to withstand bad weather, extreme temperatures, humidity, but also the but also to the damages that urban furniture can undergo. They are ideal for sports centers, aquatic centers, schools, associations and companies.

Whether it's free public water or monetized water come we can provide a variety of options and colors. One unit pulls water up manually by pressing on a foot pedal or a side button sizes between 16 ounces and 40 ounces. The other unit which accepts cashless payments will provide water from 16 ounces to five gallons with an alkaline water option

All of our systems purify water and are not just fountains that dispensed chlorinated water from public sources or cisterns. We offer a sports bottle version and a water vending version. Both provide a flow of approximately 0.4 gallons per minute. The sports bottle version operates without electricity and includes manual buttons for water dispensing, including a special one for pets that dispenses water at the bottom.

Pricing is as follows:

- Sports bottle version \$3000 monthly maintenance.
- Dimensions: 70.47x15.75x7.87 in
- Filtration; UF, Carbon, Activated Glass
- Water flow rate: 1.5 lpm
- Chiller (optional)

Requires: water supply pressure less than 45 psi + 1/2" NPT female connector.

Two wastewater outlets: 1 for auto flush the second for evacuation of surplus water in filling compartment

NEW GENERATION WATER SYSTEMS

CWT's new-generation urban fountain blends modern elegance with economic, eco-conscious, and sanitary features. In today's world, where environmental concerns and regulations are on the rise, ensuring access to clean drinking water has become essential, especially during sweltering heatwaves.

By increasing the number of high-quality water stations, both free and paid, in public spaces such as streets, squares, gardens, beaches, and museums, we not only enhance the well-being of urban residents but also elevate the town's image and allure. This step aligns perfectly with the growing emphasis on environmental sustainability and reduced waste.

In essence, CWT's urban fountain is a smart investment that not only benefits the environment but also caters to the needs of the community. It's a symbol of progress and a statement of our commitment to a cleaner, more responsible future.
